Architectural Foam and Stone Design, (AFSD) is a full service company supplying architectural foam products to the residential and commercial construction industry. AFSD offers a full range of services including: design, fabrication, project management and wholesale distribution.

AFSD products are made with the most advanced CNC hotwire cutting equipment, coatings and finishes. AFSD uses a 2 part polyurea hard coat that has a fire retardant included. AFSD products have the look and feel of real concrete, stone, or coral and are lightweight, paintable and very durable. The most important of all is that AFSD products are inexpensive and superior quality second to none.

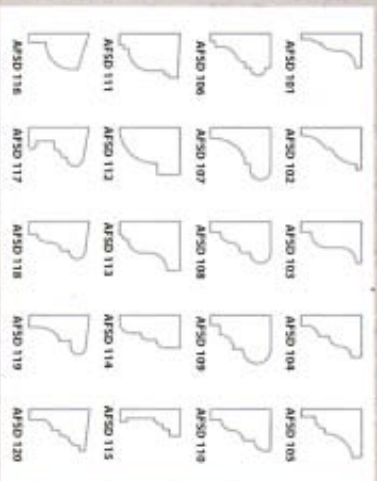

Polyurea Hard Coat System
Starts with 1.5 high density, EPS foam. Then the polyurea hard coat and primer are applied and finished with a synthetic texture.
